Molecular and Cellular Biochemistry **263:** 257–259, 2004.

Index to Volume 263

Alpert NR, *see* Palmer BM *et al*
Anderson TJ, *see* Triggle CR *et al*
Andréka P, Tran T, Webster KA, Bishopric NH: Nitric oxide and promotion of cardiac myocyte apoptosis 35–53
Arioglu E, *see* Guner S *et al*
Aslamaci S, *see* Guner S *et al*

Barnes JA, *see* Gomes AV *et al*
Barnes JA: Preface 3
Barnes JA, Singh S, Gomes AV: Protease activated receptors in cardiovascular function and disease 227–239
Barton PJR, Felkin LE, Koban MU, Cullen ME, Brand NJ, Dhoot GK: The slow skeletal muscle troponin T gene is expressed in developing and diseased human heart 91–97
Barton PJR, *see* Cullen ME *et al*
Bidasee KR, *see* Guner S *et al*
Bishopric NH, *see* Andréka P *et al*
Brand NJ, *see* Barton PJR *et al*
Brown P, *see* Ragoobirsingh D *et al*

Chua F, *see* Law PK *et al*
Clark TA, *see* Faustino RS *et al*
Cuervo AM: Autophagy: Many paths to the same end 55–72
Cullen ME, Dellow KA, Barton PJR: Structure and regulation of human troponin genes 81–90
Cullen ME, *see* Barton PJR *et al*
Czubryl MP, *see* Faustino RS *et al*

Dandekar SP, *see* Singh RB *et al*
Dasgupta T, *see* Ragoobirsingh D *et al*
Dellow KA, *see* Cullen ME *et al*
Dhalla NS, *see* Rathi SS *et al*
Dhalla NS, *see* Sethi R. *et al*
Dhalla NS, *see* Singh RB *et al*
Dhoot GK, *see* Barton PJR *et al*
Dincer UD, *see* Guner S *et al*
Ding H, *see* Triggle CR *et al*

Elimban V, *see* Singh RB *et al*

Fang G, *see* Law PK *et al*
Faustino RS, Clark TA, Sobrattee S, Czubryl MP, Pierce GN: Differential antioxidant properties of red wine in water soluble and lipid soluble peroxyl radical generating systems 211–215
Felkin LE, *see* Barton PJR *et al*

Gomes AV, Barnes JA, Harada K, Potter JD: Role of troponin T in disease 115–129
Gomes AV, Potter JD: Cellular and molecular aspects of familial hypertrophic cardiomyopathy caused by mutations in the cardiac troponin I gene 99–114
Gomes AV, *see* Barnes JA
Guner S, Arioglu E, Tay A, Tasdelen A, Aslamaci S, Bidasee KR, Dincer UD: Diabetes decreases mRNA levels of calcium-release channels in human atrial appendage 143–150
Guo L, *see* Michalak M *et al*

Gupta SK, *see* Singh RB *et al*

Haider Kh, *see* Law PK *et al*
Harada K, *see* Gomes AV *et al*
Holub BJ, *see* Holub DJ *et al*
Holub DJ, Holub BJ: Omega-3 fatty acids from fish oils and cardiovascular disease 217–225

Irving TC, *see* Palmer BM *et al*

Jiang S, *see* Law PK *et al*
Jugdutt BI, Sawicki G: AT_1receptor blockade alters metabolic, functional and structural proteins after reperfused myocardial infarction: Detection using proteomics 179–188

Koban MU, *see* Barton PJR *et al*
Koch WJ: Genetic and phenotypic targeting of β-adrenergic signaling in heart failure 5–9

Law PK, Haider Kh, Fang G, Jiang S, Chua F, Lim YT, Sim E: Human $VEGF_{165}$-myoblasts produce concomitant angiogenesis/myogenesis in the regenerative heart 173–178
Li GH, *see* Palmer BM *et al*
Lim YT, *see* Law PK *et al*
Lozak M, *see* Michalak M *et al*

Mattiazzi A, Mundiña-Weilenmann C, Vittone L, Said M: Phosphorylation of phospholamban in ischemia-reperfusion injury: Functional role of Thr^{17} residue 131–136
Maughan DW, *see* Palmer BM *et al*
McConnell BK, *see* Palmer BM *et al*
McGrowder D, *see* Ragoobirsingh D *et al*
Michalak M, Guo L, Robertson M, Lozak M, Opas M: Calreticulin in the heart 137–142
Mundiña-Weilenmann C, *see* Mattiazzi A *et al*

Opas M, *see* Michalak M *et al*

Palmer BM, McConnell BK, Li GH, Seidman CE, Seidman JG, Irving TC, Alpert NR, Maughan DW: Reduced cross-bridge dependent stiffness of skinned myocardium from mice lacking cardiac myosin binding protein-C 73–80
Pannirselvam M, *see* Triggle CR *et al*
Pierce GN, *see* Faustino RS *et al*
Potter JD, *see* Gomes AV *et al*

Ragoobirsingh D, McGrowder D, Dasgupta T, Brown P: The effect of nitric oxide on glucose metabolism 29–34
Rathi SS, Saini HK, Xu Y-J, Dhalla NS: Mechanisms of low Na^+-induced increase in intracellular calcium in KCl-depolarized rat cardiomyocytes 151–162
Ren B, *see* Sethi R. *et al*
Robertson M, *see* Michalak M *et al*

Said M, *see* Mattiazzi A *et al*
Saini HK, *see* Rathi SS *et al*
Saini HK, *see* Sethi R. *et al*
Sawicki G, *see* Jugdutt BI *et al*
Seidman CE, *see* Palmer BM *et al*
Seidman JG, *see* Palmer BM *et al*
Sethi R, Shao Q, Ren B, Saini HK, Takeda N, Dhalla NS: Changes in β-adrenoceptors in heart failure due to myocardial infarction are attenuated by blockade of renin–angiotensin system 11–20
Shao Q, *see* Sethi R. *et al*
Sim E, *see* Law PK *et al*
Singh RB, Dandekar SP, Elimban V, Gupta SK, Dhalla NS: Role of proteases in the pathophysiology of cardiac disease 241–256
Singh S, *see* Barnes JA *et al*
Smith RD, *see* Wray S *et al*

Smith SI: PPAR-γ receptor agonists—a review of their role in diabetic management in Trinidad and Tobago 189–210
Sobrattee S, *see* Faustino RS *et al*

Takeda N, *see* Sethi R. *et al*
Tasdelen A, *see* Guner S *et al*
Tay A, *see* Guner S *et al*
Todd J, *see* Triggle CR *et al*
Tran T, *see* Andréka P *et al*
Triggle CR, Ding H, TJ Anderson, Pannirselvam M: The endothelium in health and disease: A discussion of the contribution of non-nitric oxide endothelium-derived vasoactive mediators to vascular homeostasis in normal vessels and in type II diabetes 21–27

Vittone L, *see* Mattiazzi A *et al*

Webster KA, *see* Andréka P *et al*
Wray S, Smith RD: Mechanisms of action of pH-induced effects on vascular smooth muscle 163–172

Xu Y-J, *see* Rathi SS *et al*
